The Toolcompany B.V.

The Toolcompany, founded in 2001, is a toolrental company, specialized in custom made solutions to solve any problem in oil, gas, water and salt wells, and complete project engineering. Our strength is our flexibility to respond to customer needs, and to design tools suitable for any specific problem.

The Toolcompany is an independent tool rental company with no obligations or connections to any tool manufacture company. This gives us the freedom to choose for the best suitable tool for any particular area, instead of choosing for one manufacturer make, and so offer the best suitable tool and quality to our customer.

We have a wide range of tools available in our modern utilized workshop in Assen, The Netherlands. Our tool engineers have many years field experience, which gives them the ability to rapidly, create a picture of downhole problems, and to come up with solutions.

The Toolcompany has specialized in abrasive cutting equipment for punching or cutting tubing and drillpipe.

At our base we have the facility to test all flow activated tools at high flow rates, and high pressures.

The Toolcompany has also the TAM agency for Thru-tubing inflatable packer systems for continental Europe.
